

Simplify
PC management.

Amplify
productivity.

Twenty million businesses and over a billion people use Microsoft cloud services.

Take advantage of Microsoft's experience with cloud services

and IT infrastructure solutions to manage your PCs.

With over 20 years' experience with business software and nearly 15 years' experience with cloud computing, you can trust that Microsoft cloud services are delivered to you with the reliability and security you expect for your business: A financially-backed, 99.9 percent uptime service level agreement and best-in-class support around the clock.

”

“With this solution, I can better protect users' PCs—even when they're disconnected from the company network. I now have a better picture of the overall health of our IT environment and can instantly see what's running in our organization, which leads to better planning.”

*Ryan McDonnell, IT Manager,
Lerick Strategic Communications*

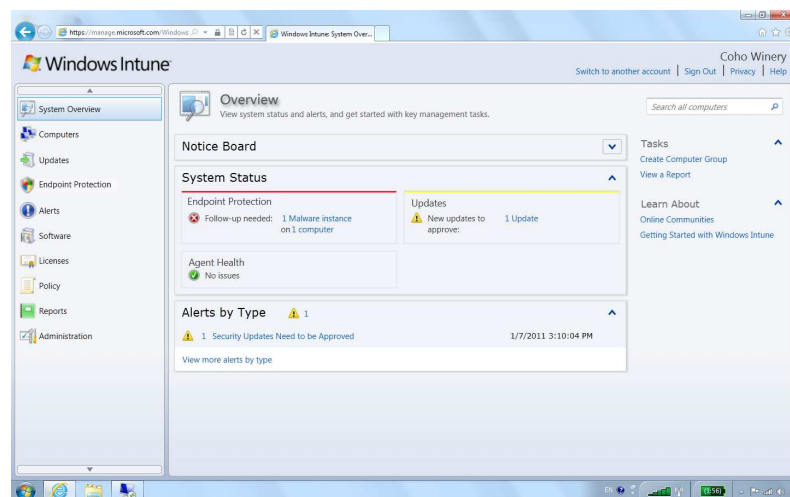

Your employees depend on you to keep their PCs running at their best, whether they are in the office or on the road. Windows Intune™ simplifies and helps businesses manage and secure PCs using Windows® cloud services and Windows 7. The Windows Intune cloud service is an integrated Microsoft solution delivering cloud-based management and security capabilities through a single Web-based console—so your computers and users can operate at peak performance from anywhere. Give your users the best Windows experience with Windows 7 Enterprise or standardize your PCs on the Windows version of your choice to reduce complexity in your PC environment. Windows Intune fits your business by giving you big tech results with a small tech investment. The result? Less hassle, and peace of mind knowing that your employees' PCs are well managed and highly secure.

Windows Intune can help your business in three key areas:

- *Help manage and secure PCs anywhere* with cloud services.
- *Provide the best Windows experience* with Windows 7.
- *Fits your business* with simple setup, maintenance, and billing.

What makes Windows Intune unique?

It's an end-to-end Microsoft solution that brings together Microsoft® cloud services for PC management and endpoint protection with a Windows 7 Enterprise upgrade subscription. With the easy-to-use, Web-based console, you get immediate insight into your PC environment and can view update and malware status, alerts, security policies, and more. You just need an Internet connection and the Windows Intune client installed on each PC you wish to manage.

Whether you are in search of a solution that can deliver the essentials of management and protection for all your PCs or just those hard-to-reach PCs—highly-distributed workers, non-domain joined PCs, field employees, or recent acquisitions—Windows Intune can help. Windows Intune can be used by in-house IT professionals or by solution providers to manage the PCs of multiple businesses.

Help manage and secure PCs anywhere.

Manage updates.

Centrally manage the deployment of Microsoft updates and service packs that you choose to all your PCs from the Windows Intune console.

Protect PCs from malware.

Help protect your PCs from the latest threats with centralized malware protection built on the award-winning Microsoft Malware Protection Engine.

Proactively monitor PCs.

Receive alerts on updates and threats so that you can proactively identify and resolve problems with your PCs—before they impact users and your business.

Provide remote assistance.

Resolve PC issues, regardless of where you or your users are located, with remote assistance.

Track hardware and software inventory.

Track hardware and software assets used in your business to efficiently manage your assets, licenses, and compliance.

Set security policies.

Centrally manage update, firewall, and malware protection settings across all of your PCs, even on remote machines outside the corporate network.

The best Windows experience.

Stay current with Windows 7 Enterprise.

Upgrade your PCs to Windows 7 Enterprise, providing users with an improved and intuitive user interface, advanced search capabilities, and BitLocker® drive encryption to help protect confidential data.

Standardize on the Windows you want.

Get the flexibility to standardize your PC environment on a single Windows platform—Windows 7 Enterprise, Windows Vista®, or even Windows XP SP3—and automatically get the rights to future versions of Windows.

Fits your business.

All-in-one solution.

Windows Intune provides a comprehensive, end-to-end solution that includes PC management, malware protection, Windows upgrades, and more in one easy purchase.

Easy to get

There's no costly server setup to use the Windows Intune cloud service, so you can start managing and protecting PCs right away.

started.

Because the Windows Intune cloud service is hosted by Microsoft, you don't have the overhead of maintaining on-site PC management servers and software.

Low overhead and maintenance.

Get any new features or updates to Windows Intune or the Windows operating system automatically as long as your subscription is active.

Always up-to-date.

Windows Intune offers a predictable monthly payment cycle that helps your business more accurately forecast expenditures.

Optional Add-On: Microsoft Desktop Optimization Pack

With your Windows Intune subscription, you also have the option to purchase the Microsoft Desktop Optimization Pack (MDOP) add-on, a set of six on-site advanced desktop management tools. MDOP can help further enhance security and control and help you resolve critical issues that could not be addressed by the cloud service, such as diagnosing and recovering unbootable PCs.

Visit <http://www.microsoft.com/windows/enterprise/products/mdop/default.aspx> for more information.
